

## Read I Am A Quadrillionaire Chapter 1786

I am a quadrillionaire chapter 1786—This level of strength would not belong to an unknown person even in Star Kingdom, let alone the entire Central Sacred Continent.

However, there was also a possibility that there was more than one killer.

This would also be possible if there were more than three peak Sovereign Rankers.

No matter if it was a single person or a force, if they dared to provoke the Lightfoot family and kill their heir, they would be suppressed heavily.

Therefore, the Lightfoot family deployed their Saint Realm grandmaster, Koen Lightfoot, so that he could take charge of this matter.

They had to quickly find the killer, and if the killer had a force behind them, the Lightfoot family would annihilate that force as well.

If the killer did not have a force, then the Lightfoot family would torture him to death in front of everyone in Star Kingdom.

They wanted Star Kingdom to learn that no one should provoke the Lightfoot family.

The deployment of the Saint attracted everyone's gaze and became the main focus of West End.

A crack appeared suddenly in the space in an unknown place in West End, Central Sacred Continent.

Two people walked out from the crack.

One of them was a middle-aged man who was the head of the Lightfoot family, Dax Lightfoot, while the other older man was the family's Saint Realm grandmaster, Koen Lightfoot.

"Grandmaster, is this the place?" Dax asked.

"Yes, according to the Bloodline Guidance Spell, this is where Archi was last seen. So, he should have died here," Koen replied.

"Let me confirm it again."

After Dax said that, he cut his finger. Then, a drop of blood flowed out and floated into the air.

After that, Dax started casting the Bloodline Guidance Spell.

The blood floating in the air started to create an invisible suction force.

It sucked the tiny blood droplets on the ground and leaves. Then, they formed a blood clot the size of a fist around the blood.

As time passed, the blood clot began to grow.

This was the blood left behind after Archimedes died.

Even though his body turned to dust after David attacked him, the attack had left behind some blood.

Dax was using the Bloodline Guidance Spell to find these blood droplets.

As he looked at the blood clot around his blood, he could confirm that this was where Archimedes had

died.

That blood clot was formed from the blood around Archimedes' heart.

Only after he died would so much remain.

Chapter 1786

“Grandmaster, Archi did die here, and I think the others died here too. Even though so many days have passed, the smell of blood still lingers here. However, I'm curious. Who could kill so many powerhouses of the family at once? There were two late Sovereign Rankers including Bernard, but none of them escaped.” Dax was puzzled.

“I can feel a glimmer of pure Saint Power. If I'm not wrong, the killer should be a Saint,” Koen said in a deep voice.

He did not expect the killer to be a Saint.

The remaining Saint Power could not be faked, so there must have been a Saint here.

Initially, he guessed that the killer was a partial Saint, but now, the killer's strength was beyond his imagination.

How did Archimedes provoke a Saint?

“What? The killer is a Saint? Grandmaster, you're not joking, right?” Dax asked.

If this was done by a Saint, then it would be troublesome.

The Saints Association would not allow two Saints to fight in Star Kingdom, meaning that the Saints Association would stop the Lightfoot family from taking revenge.

The Lightfoot family would not dare to go against the Saints Association's orders as the latter were a true

behemoth.

After the establishment of the association, only a few forces with Sacred Saints dared to go against them. This was because Sacred Saints were the deputy heads of the association.
