

## I'm A Quadrillionaire chapter 1463

Chapter 1463

Although he was puzzled, David still did what Celeste said.

After informing Celia and the others and asking them to continue chatting without him, he went back to the room.

Just after returning to the room, Celeste's voice sounded again.

"David, I... I need your help."

"Celeste, it's only been a few days and you can't hold back again?" David asked suspiciously.

It was not that he did not want to help.

However, the feeling of falling from mid-air every time was truly overwhelming.

"It's not about that!"

"It's not about that? Then what's this about?"

Celeste was still a little embarrassed.

After being silent for about half a minute, she summoned the courage to speak, "David, every time I have intercourse with you, I find that my mind power will increase significantly, and mind power is very important for a Sovereign Ranker who is about to reach the peak of Eternal Realm. It is tied to whether I can break through Eternal Realm in the future and progress to a higher level, so... I hope you can help me to make my mind power grow rapidly."

David was speechless when he heard that.

'Can intercourse also enhance mind power?

'Then why didn't my mind power grow in the slightest?'

H

From what Celeste said, she wanted to have more intercourse to enhance her mind power.

Hence, David pretended not to understand and asked, "Celeste, how can I help you?"

Celeste was stumped.

She had made herself so clear, so she could not believe that David still did not understand what she meant.

He was deliberately seeking revenge.

Celeste wanted to forget the whole idea and ignore this brat.

However, when she thought about how hard it was for her mind power to grow and how many peak Eternals had been trapped in Eternal Realm, unable to break through after a long time since the history of Star Kingdom and were finally wiped out under the catastrophe that appeared in every era, she held back.

'I can't be so impulsive.

'If I miss this opportunity to increase my mind power, I will have no idea how long I will have to wait in the future.'

The body of an Eternal could continuously generate a steady stream of vitality by itself, maintaining the vitality of various organs and cells in the body.

In theory, they could live forever since they could also automatically heal their injuries.

However, this did not mean that an Eternal would not die.

When encountering a powerful opponent who could crush them, a strong Eternal would still be killed.

For example, Celeste, a Sovereign Ranker, could crush both Ruler Rankers and Immortal Rankers.

Under normal circumstances, she could easily kill her opponents without giving them a chance to heal their injuries.

In addition, there was another situation.

When an Eternal lived to one era, which was 129600 years, and still could not break through to reach a higher level, they would face a catastrophe.

After successfully surviving the catastrophe, they would receive another 129600 years for them to squander.

If they still could not break through, then they would continue to face another catastrophe, and the catastrophes would get more intense every time.

Even the first catastrophe was not so easy to survive, whereby at least more than 90% of the Eternals would be killed.

This was also the catastrophe that all Eternals had to face.

The purpose was to keep the fittest and get rid of some Eternals who reached their current level by relying on treasures of heaven and earth.

At the same time, it was also to lighten the burden on the universe.

If there were no catastrophe, the Eternals could independently generate a steady stream of vitality and would never die.

After countless years of development, there would be too many Eternals.

Some people suspected that the catastrophes were created by a God Tier Civilization.

However, there was no solid evidence for this.

## I'm A Quadrillionaire chapter 1464

### Chapter 1464

"David, I... I want to have intercourse with you every day so that my mind power can increase rapidly and I will have a greater chance of breaking through Eternal Realm in the future. If you agree, I will... I can let you take the initiative yourself."

After saying this, Celeste blushed, appearing extremely attractive.

It was a pity that she was alone in her room now, and no one saw this scene.

David's eyes lit up.

"Okay, sure," David said.

Celeste was overjoyed when she heard David's answer.

She wanted to say something, but in the end, she could only say two words.

"Thank you."

"Celeste, you don't have to thank me. It's my honor to help you, and when we get to Star Kingdom, I still need you to take care of Celia and the others. I'm the one who should say thank you."

"Don't worry! When we arrive at Star Kingdom and the Iridescent Sect, I will make arrangements for them. Well, let's start!"

"Okay."

After that, the two would have intercourse daily.

Then, Celeste's mind power also grew at a rapid rate.

When the enormous tortoise entered the vicinity of Star Kingdom more than three months later, Celeste's mind power was already very strong.

Celeste sat in her room, a little unhappy.

They have entered Star Kingdom so she would need to part ways with David soon.

She could not continue having intercourse with him anymore.

It was a pity that she still could not raise her mind power enough to break through Eternal Realm.

If Celeste could be given another half a year, it should be almost enough.

At that time, she could devote all her energy to cultivation and strive to upgrade from a late Sovereign Ranker to a peak Sovereign Ranker as soon as possible.

Then, she would integrate her mind power, break through Eternal Realm in one fell swoop, and go beyond Eternal Realm.

She would then no longer have to be afraid of the upcoming catastrophe.

Although Celeste was only less than 2000 years old now and was more than 127000 years away from an era and she had more than enough time to do whatever she wanted, if she could go beyond Eternal Realm as soon as possible, who would want to continue to stay in Eternal Realm?

The longer one waited, the more problems one would have.

Besides, could she find another way to increase her mind power so easily in the future?

Celeste figured she could not.

She even had an urge in her heart to make the enormous tortoise turn around and go around in a circle. Then, they could return to Star Kingdom after her mind power was strong enough.

However, almost immediately, she shook her head and dismissed the idea.

This time she had also brought Amadi along.

They had already arrived at Star Kingdom, so if they turned around again, she would definitely be exposed.

Furthermore, her sect should already know that she was back by now.

Celeste regretted this.

They needed almost a year to go from the Milky Way to Star Kingdom, so why did she not do it sooner?

If only she had decided earlier, she would have had enough mind power by now.

'Sigh, what a miscalculation!'

If she did not have a choice, then she could only invite David over after she reached peak Eternal Realm and then go out together to increase her mind power.

Now that Celeste had discovered such a simple way to enhance her mind power, she would definitely not

give up.

When the enormous tortoise entered the range of Star Kingdom...
