

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 341 Teacher And Student Exchange; Welcome!

After a while, Hu Tian said, "Lin Fan is my student. My relationship with him is indeed not bad..."

"How about this? I'll ask him if he can come to the office."

"Thank you, Professor Hu." Professor Zheng was overjoyed.

If it were an ordinary student, Professor Zheng could have just gone over.

However, Lin Fan was clearly not an ordinary student.

Hu Tian reminded her, "It's just that I don't know if Lin Fan has studied biomedicine."

"It's okay, it's okay... As long as I can ask him," Professor Zheng hurriedly said.

...

Lin Fan, Ma Zhong, Song Yi, and Zheng Jinbao had just walked to the teaching building when a clap of thunder suddenly sounded outside.

Then, it began to rain heavily.

"It must be some scumbag swearing again. Hurry up and strike him to death," Song Yi shouted.

Boom!

Suddenly, another loud thunder resounded through the world. It even caused the window at the side to shake, scaring Song Yi into shrinking his neck.

"It seems like the heavens have found their target." Zheng Jinbao laughed.

"I've always been very loyal!" Song Yi said. However, when he said this, he could not help but raise his head as if he was guarding against lightning.

At this moment, the phone in Lin Fan's pocket vibrated.

Hu Tian: [Lin Fan, are you free now? Can you come to my office?]

Lin Fan said: [I happen to be downstairs. I'm coming over now.]

Then, Lin Fan said to Song Yi and the rest, "You guys go to the classroom first... Teacher Tiantian is looking for me."

After saying that, he walked toward the office.

Teacher Tiantian!

Song Yi, Ma Zhong, and Zheng Jinbao all looked at Lin Fan with envy.

Song Yi said, "I finally know why the heavens are thundering."

After saying that, he raised his head and shouted, "God, remember to aim better next time."

Boom!

A thunderclap rang out, causing everyone's eardrums to buzz. Song Yi was so frightened that he almost fell to the ground.

...

After a while, Lin Fan arrived at his office.

When he saw that there was a strange woman inside, he was slightly stunned.

Hu Tian first handed him a cup of coffee and then introduced, "This is Professor Zheng Qian from the Biology Department."

Professor Zheng quickly bent over and said excitedly, "Lin Fan, hello, hello."

"Hello, Professor Zheng," said Lin Fan.

If there were any outsiders here, they would have thought that Lin Fan was the teacher and Zheng Qian was the student.

"Professor Zheng, don't you have something to ask Lin Fan?"

When Lin Fan heard this, his face turned weird. What could she possibly ask him?

Professor Zheng quickly took out a stack of documents from her bag and said, "Lin Fan, this's a project that Professor Wu Tian and I have been working on since the year before before... 'Research on Restoring the Balance of Insulins in Diabetes'...

"However, after two years of research, Professor Wu Tian and I have encountered many problems. Here, here, and here... How should we resolve this?"

Diabetes?

Insulins?

She was asking Lin Fan?

He... He did not understand at all.

Suddenly, a crisp notification rang out in Lin Fan's mind.

[Ding! You've triggered a mission. Watch a biology experiment and read 'Introduction to Insulins', 'Treatment of Diabetics', 'Pharmaceutics and Pharmaceutics', 'Pharmaceutics Technology', and 'Microbiology and Immunity Technology'. You'll receive Professor-Level Biology Experience, human islet recovery medicine, its manufacturing principle, and a complete thesis.]

When Lin Fan heard this, a weird look appeared on his face.

He had just encountered a problem with biomedicine, and in the blink of an eye, he had triggered the corresponding mission?

Professor Zheng saw that Lin Fan did not say anything for a long time and was not looking at the information. She thought that Lin Fan had not studied biomedicine and glucose. She could not help but sigh.

Even though she was already mentally prepared for this, after getting this result, she still felt a little depressed.

Was the Biology Department really going to fall?

Professor Zheng opened her mouth and was about to say something...

At this moment, Lin Fan said, "Bring me to the laboratory to see your experiment."

"Huh?"

Professor Zheng was slightly stunned.

Lin Fan said, "What? Is it inconvenient to watch the experiment? Do you need to keep this experiment a secret?"

After hearing Lin Fan speak again, Professor Zheng was overjoyed. "No, definitely not. Lin Fan, our laboratory is in front. This way, please..."

Lin Fan wanted to see the experiment, which proved that he had studied biomedicine and glucose!

This was good news for the Biology Department, absolutely good news!

In fact... Biomedicine experiments needed to be kept confidential, and they were very strict.

However, they could make an exception for Lin Fan.

They even wanted to invite Lin Fan over to take a look.

Lin Fan did not leave the office immediately. Instead, he said, "Teacher Tiantian, I'll go to the biology laboratory to take a look."

Hu Tian nodded and said, "Professor Zheng, remember to tell Professor Wu Tian that diabetes is a problem of the century. It's not something that can be solved in a short period of time. Tell him not to be too hasty."

Obviously, she was taking precautions.

This was to prevent everyone from being unhappy if Lin Fan was not able to give any suggestions after watching the experiment.

When Professor Zheng heard this, her smile disappeared.

She also understood this principle, so she promised, "I'll be sure to relay Professor Wu Tian your message."

The weather in Jiangbei was like a woman's temper. It was suddenly stormy and suddenly peaceful.

When Lin Fan and Professor Zheng walked out of the office, the wind and rain had stopped. The sun was bright in the sky.

The two of them crossed the wet field and went straight to Training Building No. 2.

Walking in the spacious corridor, the air was faintly filled with a pungent smell, and there were muffled sounds coming from time to time.

When the door of the laboratory was pushed open, they saw three graduate students wearing medical protective clothing. They were doing experiments with their heads lowered.

They were so careful and focused that they did not even notice Lin Fan and Professor Zheng when they walked in.

At this moment, a middle-aged man wearing gold-rimmed glasses who had been focused on his computer seemed to have heard the sound and looked toward the door.

When he saw Professor Zheng, his expression did not change.

When he caught sight of Lin Fan, his murky eyes lit up.

He put down what he was doing and ran toward Lin Fan. He stretched out his hands and bowed slightly. He said excitedly, "Hello, Lin Fan. Welcome to our biology laboratory!"

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 342 Watch The Experiment; Mission Completed!

The middle-aged man with gold-rimmed glasses was Professor Wu Tian.

Wu Tian had a deep impression of Lin Fan. It could even be said that he admired Lin Fan.

A professor worshipping a student?

That was right!

Lin Fan solved several difficult math problems, invented the earthquake prediction device, super batteries, and so on.

In Wu Tian's eyes, Lin Fan was almost omnipotent.

Therefore, when the biomedicine project encountered an unsolvable problem, he immediately thought of Lin Fan.

That was why Zheng Qian went to ask Hu Tian for help today.

Since others were friendly to him, Lin Fan naturally would not put on airs.

"You must be Professor Wu Tian, right?"

"There's no professor in front of you," Wu Tian hurriedly said. "You can just call me Old Wu."

The three graduate students who were focused on their experiments heard their conversation and stopped what they were doing. They looked at Lin Fan curiously.

Almost everyone at Jiangbei University knew the name Lin Fan.

However, Lin Fan did not accept interviews.

Hence, there were very few people who knew what he looked like.

Suddenly being stared at by so many people, Lin Fan felt a little uncomfortable.

He coughed lightly and said, "Old... Wu...Forget it, I'll just call you Professor Wu.

"Professor Wu, can I watch you complete an experiment?"

Wu Tian did not hesitate at all and said directly, "The three of you, complete the experiment once. Remember, you must do it well!"

The three graduate students nodded vigorously. Then, they took a deep breath and started the experiment from the beginning with a more careful and focused expression.

They looked like soldiers who were about to be inspected.

This kind of biological experiment was very difficult to see with the naked eye. Wu Tian pointed at the computer screen and said, "Lin Fan, please look here..."

Lin Fan saw...

The cells that were usually invisible were densely packed on the three screens.

In the beginning, the cells in the three screens were slowly wriggling in the solution.

However, as time passed, the cells squirmed slower and slower.

In the end, some of the cells were completely silent.

At this moment, the three graduate students injected three different liquids.

The cells on the first screen resumed squirming but soon stopped moving.

The cells on the other screen seemed to have gone crazy. They squirmed rapidly, but they stopped at an even faster speed.

The cells on the last screen did not respond at all.

...

Immediately after, red, blue, and yellow curves appeared on the screen.

The one-hour-long experiment ended.

Professor Wu Tian asked in an expectant tone, "Student Lin Fan, what do you think? How should I improve it?"

In fact, not only was Wu Tian looking forward to it, but Professor Zheng and the three graduate students were also looking forward to it.

Lin Fan did not reply immediately.

Instead, he placed his attention on the system mission.

[Mission: Watch a biological experiment (1/1), read 'Introduction to Insulins', 'Treatment of Diabetics', 'Pharmaceutics and Pharmaceutics', 'Pharmaceutics Technology', and 'Microbiology and Immunity Technology' (0/5). You'll be rewarded with Professor-Level Biology Experience, human islet recovery medicine, its manufacturing principle, and a complete thesis.]

Seeing this...

Lin Fan let out a satisfied look and said, "I'll go to the library first."

After saying that, he turned around and left, ignoring Wu Tian, Zheng Qian, and the others who were still in a daze.

After the heavy rain, the air in the library was filled with a sweet smell, making the library even more crowded than usual.

If an ordinary person came to the library, they would be like a drop of water merging into the sea. They would not be discovered at all.

However, Lin Fan was like a dazzling sun. As soon as he walked into the library, someone immediately came over to greet him.

"You're here," a female student said with a smile.

She was Lu Ling, whom Lin Fan had met several times in the library.

Today, Lu Ling was wearing a long blue dress and a pair of white shoes. She was like the blue sky and white clouds, looking very fresh.

Lin Fan smiled and nodded. "Yes."

"What books are you looking for this time?" Lu Ling asked. "Let me help you."

Lin Fan did not stand on ceremony. He said directly, "Introduction to Insulins, Treatment of Diabetics, Pharmaceutics and Pharmaceutics, Pharmaceutics Technology, and Microbiology and Immunity Technology."

"Is that the field of biomedicine? Over there." Lu Ling nodded and walked toward the bookshelf on the left.

Soon, a large row of books on biomedicine appeared in front of them.

Obviously, she was very familiar with the entire library.

With Lu Ling's help, they found the five books in a short while.

Then, Lu Ling led Lin Fan to the place where they usually sat.

Lin Fan did not waste time chatting. He picked up a book and started flipping through it.

For two minutes, the sound of a book being flipped could be heard. A book that was a hundred pages thick had been read from the beginning to the end.

Then, the second book, the third book...

Ten minutes later, he finally closed the last book.

At this point, he had finished reading all five books.

At this moment, a crisp notification rang out in Lin Fan's mind.

[Ding! Mission completed. Watch a biological experiment (1/1), read Introduction to Insulins, Treatment of Diabetics, Pharmaceuticals and Pharmaceuticals, Pharmaceuticals Technology, and Microbiology and Immunity Technology (5/5). You'll be rewarded with Professor-Level Biological Experience, human islet recovery medicine, its manufacturing principle, and a complete thesis.]

Instantly, Lin Fan's mind was filled with a lot of knowledge about living things, especially about islets.

Lin Fan was not too surprised by this result. He just quietly accepted this knowledge.

Lu Ling saw that Lin Fan had finished reading all the books and could not help but ask, "Are you planning to study biology?"

She had seen Lin Fan quickly flip through books on different subjects several times. Every time he finished flipping through, he would solve a problem not long after... Or he would invent something that shocked the world.

Therefore, Lu Ling no longer naively thought that Lin Fan was just flipping through books for fun.

Lin Fan said, "I've already finished researching."

"Huh?" Lu Ling blinked her big eyes, her pretty face full of confusion.

Lin Fan did not continue to explain. He looked down at the questions on the table and asked, "Are there any questions you don't know?"

However, Lin Fan seemed to have helped her solve some questions every time she saw him.

It seemed to be true.

Lu Ling's pretty face turned slightly red, and she said in a soft voice, "Yes."

Having just completed his mission, Lin Fan was in a pretty good mood.

He picked up a pen and paper and wrote down the answers to the questions in front of him in an ingenious and detailed way.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 343 Send; Become A Mine Owner!

Lin Fan's mind was filled with the biology knowledge that he had just obtained.

Therefore, he did not stay in school for long. Instead, he drove the Mercedes-Benz G-Class alone and went straight back to Coiling Dragon Villa.

On the coffee table in the living room, there was a stack of documents... 'Human Islet Recovery Medicine Technique.'

Next to it were bottles of transparent liquid.

Obviously, this was the reward for completing the mission.

These bottles of transparent liquid were precisely the human islet recovery medicine.

Lin Fan thought about it and called out, "Lil White."

"Master, please give your instructions." The super smartwatch on his wrist made a crisp sound and flashed a gentle light.

Lin Fan's lips twitched. Where did this guy learn his lines from?

"Can you help me register the patent of the human islet recovery medicine?"

As Lin Fan spoke, he waved the bottles and documents in his hands.

Even though Lin Fan did not lack money, directly contributing his technology was... He was not able to do so.

He was not a good person.

The super smartwatch shot out a red beam of light and scanned the documents and the human inlet recovery medicine.

"Of course, no problem."

Then, countless codes appeared on the super smart watch.

About ten minutes later, Lil White spoke again, "Master, I've already registered a global patent."

At the same time, electronic patent documents appeared on the screen of the super smart watch.

Lin Fan said, "Not bad."

"Thank you for your compliment, Master," said Lil White happily.

A smiley emoji appeared on its screen.

Lin Fan looked at the computer not far away and muttered, "Let's just write the thesis."

As he spoke, he strode forward.

Five seconds later, the computer turned on.

Lin Fan's hands were jumping across the keyboard.

A series of extremely complicated papers appeared on the screen.

About an hour later, a complete thesis appeared!

Lin Fan wrote his name in the first author position.

Wu Tian and Zheng Qian were written as the second authors.

When he was working on the super battery thesis, Zhao Xueqin and Li Rongfa were the ones who showed Lin Fan the experiment.

Hence, Lin Fan put down their names as the second authors.

This time, Wu Tian and Zheng Qian let him watch the biological experiment. Naturally, Lin Fan would not be biased.

"I sent it to Science last time, so I'll send it to Nature this time."

Lin Fan muttered to himself. He found Nature's email and sent it.

Then, Lin Fan said, "Lil White, do the same as last time. Get the thesis approved in the shortest time possible."

"Leave it to me, Master!" Lil White said.

...

At this time, it was early in the morning in America.

Barry Aiken, the editor of Nature, was lying on a soft bed, sleeping soundly.

The next moment, the sound system, television, washing machine, and refrigerator in his house... All the electrical appliances that could make a sound rang out at the loudest volume.

Barry Aiken was so frightened that he stood up. His eyes widened as he cried out in surprise, "The machines have turned into monsters!"

Plop!

Then, he fell straight to the ground and fainted.

It was also at this moment that the electrical appliances in the room returned to normal.

This happened to Esmond Bevans, who was also an editor of Nature, as well... All the electrical appliances are ringing.

...

That night, the appliances in the homes of many Nature editors turned on automatically and made sounds.

Some editors fainted from fright, while others fell ill from fright... As for the chief editor, he found an email in his computer mailbox—Principles of Human Islet Recovery Medicine.

The next day, in the Humph University's biomedicine laboratory, under the leadership of several world-famous biomedicine professors, an extremely urgent experiment was carried out.

...

Lin Fan was completely oblivious to all of this.

He had just woken up from his dream and looked at his phone screen.

[Notice from Merchant Bank: 7,532,102 yuan was deposited into your account.]

Lin Fan put his phone aside and muttered, "Let's see what I can get by signing in today."

"Sign in!"

[Ding! Congratulations, you've obtained the mountains in the southern suburbs of Jiangbei City.]

"Mountains in the southern suburbs? What's the use of this? I can't be the king of the mountains..." Lin Fan shook his head and said, "Forget it. It's better than ten million."

At this moment, Lin Fan's phone rang.

He looked at the caller ID and saw that it was Liu Yuhang.

Lin Fan had a good impression of Liu Yuhang.

Firstly, if Liu Yuhang had not provided him with the information about the 100-year-old ginseng, Lin Fan would have had to spend a lot more time to obtain the 100-year-old ginseng and obtain the right to purchase Medical Water.

Secondly, Liu Yuhang's personality and character were both very good.

Therefore, Lin Fan pressed the answer button.

"Good morning, Brother Lin Fan! Did I disturb your rest?" As soon as the call connected, Liu Yuhang's loud voice came through.

Lin Fan said, "No, I've been up for a while."

"That's good!" Liu Yuhang said. "Brother Lin Fan, I have good news for you!"

"Good news?" Lin Fan asked curiously.

Liu Yuhang did not answer immediately. Instead, he asked, "Brother Lin Fan, the mountains in the southern suburbs of Jiangbei are under your name, right?"

Liu Yuhang already knew about the mountains when he had just acquired them?

Was he that resourceful?

Even though he was thinking this way, Lin Fan still replied, "Yeah, why?"

"It really is you, Brother Lin Fan! Hahaha! Brother Lin Fan, congratulations, you've found a mine in that mountain, a gold mine!" Liu Yuhang shouted excitedly.

He seemed happier than if he were to discover his own mine.

Lin Fan was stunned.

He never expected to find a gold mine in the mountains!

In that case, would he not become a legendary mine owner?

"Brother Lin Fan, according to the expert's estimation, the gold ore in your mountains is worth more than tens of billions of yuan!"

Initially, Lin Fan was a little curious and happy that he had become a mine owner.

After hearing Liu Yuhang's words, he became much calmer.

Worth tens of billions of yuan?

He owned several companies and buildings of the same value.

His shares in Little Tanuki Group and Penguin Group had reached more than a trillion!

He really did not need to care too much about a mere tens of billions of yuan.

Hence, Lin Fan said, "Is that so? Then my luck isn't bad."

He had obtained a gold mine worth tens of billions of yuan.

However, he only said one sentence. His luck was not bad?

Was this just 'not bad'?

This was great, alright?!

If it were someone else, they would probably jump up in joy!

However, Liu Yuhang thought about how Lin Fan had increased his funds by 400% in three days. He felt a little enlightened.

After all, for a financial genius, tens of billions were nothing, right? Yes, that should be it.

344 A Beautiful Woman Should Wear Beautiful Clothes; Crying! (1)

Today, when geologists discovered that there was a gold mine in the southern suburbs, it caused quite a stir in Jiangbei City.

Many people, including the Jiangbei government, wanted to get involved.

However, they soon discovered that the mountains had an owner.

The master's name was Lin Fan.

That was why Liu Yuhang had called Lin Fan.

Liu Yuhang and Lin Fan chatted for a while more before hanging up.

Lin Fan rubbed his chin and said, "A gold mine?"

After thinking for a moment, he dialed the number of the general manager of the Flying Dragon Security Company, Wang Shengli.

Wang Shengli seemed to have been waiting for the call. It rang once before it was immediately picked up.

“Hello, Mr. Lin. What can I do for you?” Wang Shengli said in an extremely respectful tone.

Lin Fan was quite satisfied with Wang Shengli.

The preparation of buses every time he and his classmates gathered as well as how he handled the situation at the Hyatt Hotel previously showed that he had good work ability and attitude.

Lin Fan said, “I found a gold mine in the mountains in the southern suburbs. Do you have a way to mine it?”

When Wang Shengli heard this, his breathing became hurried.

Was Mr. Lin going to put him in an important position?

“Mr. Lin, I promise that I can extract all the gold!” he said excitedly.

“Good!” Lin Fan said.

After Lin Fan finished his breakfast, he drove his Mercedes-Benz G-Class and headed straight for the KM mall.

He had made an appointment with Qiu Ziqian and Huang Ling to go shopping together yesterday.

During this period of time, he was either in school, accompanying Ling Rou, or going to Li City to fetch Su Ningjing.

As a result, it had been a while since he had accompanied Qiu Ziqian and Huang Ling.

...

At this moment, Qiu Ziqian and Huang Ling had already arrived at the entrance of the KM Mall.

Qiu Ziqian was wearing a colorful dress today. It complemented her voluptuous figure and snow-white skin. She looked like a fairy standing in the rainbow.

Huang Ling was wearing a light yellow dress. Her beautiful face and perfect figure were filled with warmth. She could melt people’s hearts.

The two of them stood at the entrance like beautiful scenery, attracting the gazes of all the handsome men and beautiful women who came in and out.

At the same time, they also attracted the attention of a man with long back hair who was dressed in a white shirt. His name was Guo Zixiang.

Guo Zixiang was an ordinary white-collar worker.

Usually, his hair would be styled in a bowl cut and he would wear gold-rimmed glasses every day. He was a yes-man in the company.

Today...

He changed his style and did a hairstyle that he thought was handsome. He changed into fashionable black-rimmed glasses, raised his head, puffed out his chest, and walked forward with arrogance. He was very smug.

Last night, his father called to say that there was a mine in the mountain in front of their house—a gold mine!

After Guo Zixiang received the news, he immediately jumped up for joy.

A gold mine!

This meant... he would soon become a super-rich tycoon!

In the past, he had been submissive because he always felt that he was poor and inferior.

Now that he knew he was going to be rich, he was completely free.

The sleeping beast in his heart had finally awakened.

In the past, Guo Zixiang would never dare to strike up a conversation with a beautiful woman.

Today, however, he dared to!

...

Qiu Ziqian said, "Lin Fan should be here in a while. Let's go to the entrance and take a walk."

"Yes, yes!" Huang Ling said.

Hence, the two of them walked into the Chanel shop at the entrance.

"Welcome to Chanel." The saleswoman smiled and said, "May I help you?"

"We'll just take a look first," Qiu Ziqian said.

"Alright," the female sales assistant said.

Hence, Qiu Ziqian and Huang Ling looked at the clothes one by one and compared them to the other. They were like children who had seen their favorite toy and their faces were full of smiles.

However, they did not notice that a man had been following behind them. It was Guo Zixiang.

It was Guo Zixiang's first time entering a Chanel store.

He first stole a glance at Qiu Ziqian and Huang Ling. Then, he could not help but pick up two pieces of clothing to secretly look at the price.

28,999 yuan!

45,888 yuan!

Guo Zixiang was shocked and could not help but take two steps back.

The price was simply too expensive.

At this moment, Huang Ling suddenly noticed the blue garment of clothing that Guo Zixiang had just seen. The price was 28,999 yuan. She said, "That one seems pretty good."

When Guo Zixiang heard this voice, his entire person went a little limp.

Then, he suddenly thought of something.

He was now a super-rich tycoon!

It was just a dress that cost tens of thousands of yuan!

Thus, he raised his head again like a gentleman and took two steps forward. He picked up the piece of clothing that cost 28,999 yuan and smiled at Huang Ling. "Beautiful women should wear more expensive clothes."

Then, he turned to the salesperson and said, "Hello, please wrap this dress up."

After saying that, he handed over a bank card.

"Alright," the salesperson said.

She picked up the bank card and swiped it gently on the POS machine.

Beep!

A crisp sound rang out from the machine.

Then, the receipt appeared.

Guo Zixiang picked up the dress and handed it to Huang Ling, saying, "For you, pretty lady."

He felt that he was so cool now.

The beauty would definitely be touched beyond words.

Guo Zixiang even began to imagine... he and Huang Ling eating together and holding hands.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 345 A Beautiful Woman Should Wear Beautiful Clothes; Crying! (2)

However... Huang Ling's voice quickly interrupted his imagination. "No need."

Guo Zixiang was not angry and said, "You don't have to be polite with me, pretty lady."

At this moment, a crisp sound came from the entrance of the shop.

"She's not being polite. If she likes it, I'll buy it for her."

This voice belonged to Lin Fan.

Qiu Ziqian's and Huang Ling's eyes lit up when they heard that.

Then, they rushed forward and hugged Lin Fan's arm tightly. They said happily, "Lin Fan!"

If it were in the past, Huang Ling would have been more reserved.

She would not hug Lin Fan with Qiu Ziqian in a crowded place.

However, after not seeing him for a while, Qiu Ziqian's longing for Lin Fan reached an uncontrollable level.

Therefore, she could not care less.

Seeing this...

Guo Zixiang froze.

W-What was going on?

These two beauties actually had a boyfriend!

Moreover, it seemed to be the same person!

Why?

Why?

Lin Fan did not care about that. He turned to the salesperson and said, "Help me wrap up all the clothes that they took a fancy to just now."

When Huang Ling and Qiu Zi heard this, they immediately felt as if they had eaten candy.

The salesperson was a little stunned and said, "T-There are a total of eight pieces of clothing. Do you want all of them?"

Lin Fan nodded. "Yes."

"Yes, Sir," the salesperson said excitedly.

She quickly packed the clothes and said, "It's a total of 198,990 yuan."

Eight pieces of clothing for less than 200,000 yuan. What a bargain!

Lin Fan took out his bank card.

Beep!

After a soft sound, the receipt appeared.

At the same time, 19 red packets appeared in Lin Fan's phone.

Then, Lin Fan held Huang Ling's left hand and Qiu Ziqian's right hand as they walked out together.

Only Guo Zixiang was left, holding a piece of clothing that cost 28,999 yuan. He was stunned.

The salesperson beside him saw that he had been standing in the shop without moving. She could not help but ask, "Sir, do you need any more help?"

Guo Zixiang came back to his senses and waved his hand repeatedly. "No, no, no. No need."

Then, he walked out of Chanel.

At this moment, Guo Zixiang's stomach growled.

He glanced at the barbecue restaurant in front of him and walked in.

Perhaps it was because he had just spent tens of thousands of yuan and had not succeeded in hitting on a beautiful woman, he wanted to eat something to vent his anger.

Perhaps it was because he had become a super-rich tycoon, so he wanted to indulge in high-quality beef.

Therefore, Guo Zixiang ordered a lot of dishes for this meal.

He was very satisfied.

Guo Zixiang burped and wiped the grease from the corner of his mouth.

"Waiter, the bill, please!"

"Hello, that's 799 yuan in total," the waiter said.

In the past, Guo Zixiang's heart would definitely hurt if he spent 799 yuan on a meal.

Today, he was very relaxed.

After all, he was now a super-rich tycoon.

Hence, he casually took out his bank card.

The waiter took the bank card and gently swiped it on the POS machine, but soon, there was an urgent series of beeps.

"I'm sorry, but your bank card has insufficient funds," the waiter said.

"Insufficient funds?" Guo Zixiang frowned. "How is that possible?"

However, he quickly remembered that he only had 46,000 yuan on his card.

He had just used 45,888 yuan to buy a Chanel dress. It seemed normal that his card had insufficient funds.

Then, Guo Zixiang took out his phone and looked at his WeChat balance—1.3 yuan.

He could not help but cough and say, "Uhh... Waiter, wait a moment. I'll make a call first."

"Alright," the waiter replied.

After saying that, he walked to the side.

However, the waiter's eyes were fixed on Guo Zixiang.

It was obvious that he was trying to prevent him from escaping.

Guo Zixiang did not notice this. He dialed his father's number directly.

After two rings, the call was connected.

"Zixiang, why are you calling?" His father's slightly hoarse voice came from the phone. At the same time, there was a dull rumble.

"Dad, what's that sound?" Guo Zixiang asked.

"Didn't I say yesterday that a gold mine was discovered in the mountains? So the machines are here to mine!" Guo An said. As he spoke, he spat out a mouthful of thick phlegm.

Guo Zixiang had never liked his father spitting. He thought it was very disgusting.

However, at this moment, he thought he heard the sound of nature.

He... He was finally going to become a super-rich tycoon!

"Really?" Guo Zixiang said excitedly. "They're already here to mine? Dad, transfer me a few hundred thousand yuan first."

"What? What did you say, you son of a b*tch?!" Guo An shouted.

Guo Zixiang said, "Transfer me a few hundred thousand! Since we've found a gold mine, our family should get at least tens of millions, right?"

"Who told you that we're going to get tens of millions?!" Guo An shouted.

"Bullsh*t! What does it have to do with us that someone else discovered a gold mine?"

Guo Zixiang was stunned for a moment and said, "D-Didn't Grandpa say that the mountains belong to our family?"

"Your grandfather also said that he was a commander in the past!" Guo An shouted. "He was just a soldier on the front lines!"

Guo Zixiang's heart turned slightly cold. Immediately after, he said, "But... But didn't our family use to farm in the mountains?"

Guo An sneered. "I've pooped in the park before. Does that mean the park is mine too? Is there anything else?" Guo An asked. "If there's nothing else, I'll go and look at the excavators!"

After saying that, he hung up the phone.

Guo Zixiang held his phone and was in a daze.

No...

There was no gold mine in his family.

He was no longer a super-rich tycoon.

There was nothing else.

Everything was gone.

When he slowly lowered his head and saw the Chanel dress that he had spent 45,888 yuan on, his eyes turned slightly red as he started crying.

At this moment, the waiter walked over and said, "Excuse me, sir. Are you going to pay now?"

...

Lin Fan, Qiu Ziqian, and Huang Ling had no idea what Guo Zixiang had experienced.

The three of them chatted as they shopped. They were very relaxed and happy.

When they left the mall, they bought 20 pieces of clothing, six pairs of shoes, and three bags. It was a fruitful trip.

At night, Lin Fan brought Qiu Ziqian and Huang Ling to Tribute Garden Restaurant.

Dozens of waiters had already lined up in two rows to welcome them.

The luxurious private room was filled with rose petals and swaying candlelight, forming a big heart. On the huge dining table, there were many tempting delicacies and wine.

When the three of them walked into the room, fireworks exploded outside the French windows, forming a dazzling heart shape.

Flowers, delicacies, wine, fireworks... It was like a dream.

Qiu Ziqian's and Huang Ling's beautiful eyes flickered along with the candlelight.

This meal was filled with happiness.

When Lin Fan brought Qiu Ziqian and Huang Ling back to Yi Ke City...

Qiu Ziqian and Huang Ling could not hold themselves back anymore and pounced into Lin Fan's embrace.

This night was destined to be sleepless.

...

After that, Lin Fan stayed in Yi Ke City for two days.

It was not until the third day that he returned to the Coiling Dragon Villa.

He sat on the soft sofa and looked at the 302 red packets on the screen. He muttered, "302? Let's see what I can get.

"Open them all!"

[Ding! Congratulations, you've obtained two yuan.]

[Ding! Congratulations, you've received 1,999 yuan.]

...

[Ding! Congratulations, you've received 888 yuan.]

[Ding! Congratulations, you've obtained a car—Cullinan.]

...

[Ding! Congratulations, you've received 334 yuan.]

[Ding! Congratulations, you've obtained a one yuan critical hit card.]

...

The 302 red packets were obtained by spending 3.02 million yuan.

After opening these red packets, Lin Fan received a total of 89,112 yuan, a Cullinan, and a one yuan critical hit card.

Cullinan's price was nine million.

As for the one yuan critical hit card, he could earn 100 million yuan if he spent one yuan!

Regarding this... Lin Fan's expression did not change at all.

He was still sitting on the sofa and playing with his phone.

After two days of hard work...

That night, Lin Fan slept very comfortably and soundly.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 346 Published In Nature!

Lin Fan slept comfortably and soundly...

The medical and pharmaceutical industry, on the other hand, was in an uproar as if a level 12 storm had been set off.

This was because there was a new paper published in Nature—Principles of Human Islet Recovery Medicine.

Gray Rui Medical Group, America.

The president, Jonathan Darwin, stared at the screen with his sharp eyes.

The two technical directors were like puppets, holding their breaths and standing at the side.

After a long time, Jonathan Darwin slowly said, "What do you guys think?"

The technical director who wore gold-rimmed glasses said, "Last night, I conducted an experimental analysis based on the paper. The data is completely consistent."

The taller fair-skinned technical director said, "This paper was jointly tested by Professor Mantis, Professor Harvin, Professor Roslev, and other professors from the University of California. They did a total of ten sets of data, and each set of data matched the paper."

Jonathan Darwin said, "So you're saying that this human islet recovery medicine can really treat diabetes?"

The two technical directors looked at each other and nodded. "From the current data, that's indeed the case."

Jonathan Darwin got up and paced back and forth in his office.

After a while, he picked up the phone on the table and said, "Arnie, contact Lin Fan, the author of Principles of Human Islet Recovery Medicine, as soon as possible. I want to obtain the patent for the human islet recovery medicine at all costs. At the very least, I want to obtain the rights to develop and sell the patent!"

Jonathan Darwin was the CEO of Gray Rui Group, one of the world's top pharmaceutical companies. He knew very well what this medicine meant.

Some people said that AIDS was the most terrifying. There were tens of millions of people suffering from AIDS worldwide, and hundreds of thousands of people died from AIDS every year.

The number of people suffering from diabetes in the world had reached hundreds of millions. Almost every second, several people died of diabetes.

In the medical world, the danger and importance of diabetes could definitely be ranked in the top ten diseases!

Now, someone had actually developed a drug to treat diabetes. To pharmaceutical companies, this was like a nuclear weapon!

Therefore, not only Gray Rui Group but other powerful groups like Luo Shi Group were making similar moves.

...

Lin Fan did not care about any of this.

When the dazzling sunlight shone through the cracks of the trees and onto the ground like a dazzling star, Lin Fan slowly opened his eyes.

Out of habit, he glanced at his phone. A text message had already appeared on the screen.

[Notice from Merchant Bank: 7,489,000 yuan was deposited into your account.]

"Sign in!"

[Ding! Congratulations, you've received 1,000,000 yuan.]

Lin Fan ignored the message and yawned. He slowly got up, washed up, and ate breakfast.

When Lin Fan walked out and opened the door, a tall and sturdy car appeared at the door.

It was a Cullinan, which he had obtained yesterday.

Lin Fan nodded in satisfaction. "This car looks good. I'll drive it today."

As soon as he finished speaking, Lin Fan opened the car door and sat inside.

The soft leather seats, the carbon fiber panels, and the steering wheel that was full of texture, coupled with the dazzling starry ceiling, gave people a luxurious and comfortable experience.

Boom!

He stepped on the accelerator, and the V12 with 571 horsepower made the entire car roar like a dragon.

About 20 minutes later, Lin Fan arrived at Jiangbei University.

Lin Fan had just parked his car when Song Yi, Ma Zhong, and Zheng Jinbao happened to pass by with their school bags.

"A Cullinan! Brother Lin Fan, you changed cars again?" Song Yi's eyes widened like light bulbs.

Zheng Jinbao said excitedly, "The appearance of it is too domineering!"

Ma Zhong did not say anything, but he stared at Cullinan without blinking.

Obviously, he was also very fascinated.

"Brother Lin Fan, can we go in and take a look?" Song Yi asked.

Lin Fan smiled. "Of course. Why are you being so polite with me?"

"Alright!" Song Yi said happily.

Zheng Jinbao and Ma Zhong... could not wait to get into the Cullinan either.

"The seats are too comfortable!"

"A starry sky!"

"Is this an umbrella that costs 100,000 yuan?"

...

The three of them touched each corner of the car, occasionally letting out a sigh of praise.

After a long time, they reluctantly left the Cullinan.

"Brother Lin Fan, where have you been these past few days?" Song Yi asked. "Were you busy getting this Cullinan?"

"That's not true. Someone sent the Cullinan directly to my house... In the past few days, I wrote a thesis and got a piece of land," Lin Fan said.

In Lin Fan's eyes, the mountains... also belonged to the earth.

Therefore, there was nothing wrong with saying that he got a piece of land.

However, when Song Yi and the others heard it, they were puzzled.

"Is it a very big piece of land?" Ma Zhong asked.

"It's quite big," Lin Fan said in a relaxed manner. "The mountains in the southern suburbs are mine now."

Silence.

The entire scene was suddenly silent.

Ma Zhong, Song Yishang, and Zheng Jinbao were stunned.

Lin Fan had taken ownership of a giant piece of land!

"Brother Lin Fan, I'll kneel before you," Song Yi, Zheng Jinbao, and Ma Zhong said in unison.

...

Just as Lin Fan and the others walked into the classroom, an excited voice suddenly sounded from behind them.

"Lin Fan!"

Lin Fan turned around slowly. It was Professor Zheng Qian and Professor Wu Tian from the Biology Department.

"Lin Fan, your Principles of Human Islet Recovery Medicine has been published in Nature!" Professor Zheng Qian said excitedly.

As soon as he said this...

The noisy classroom immediately quieted down because there was no class.

They did not know what the Principles of Human Islet Recovery Medicine represented or what kind of paper it was.

However, everyone had heard of Nature!

If an ordinary student published a thesis on Nature, they would definitely be able to get a postgraduate degree, a Ph.D. degree, or stay in school!

If an ordinary teacher published a thesis on Nature, they would be promoted to a full professor!

If they remembered correctly, Lin Fan had just published a paper in Science not long ago, right?

Now, he had published a paper on Nature?

They were all humans, so why was there such a huge difference between them?

Wu Tian said, "Lin Fan, we didn't do anything, but you wrote our names as the second authors. We... We don't deserve it."

At the mention of this matter, Wu Tian's face was filled with shame and admiration.

Back then, when he encountered many unsolvable problems in his experiment on the hormone, he thought of Lin Fan immediately.

Lin Fan did not say much after he arrived at the laboratory.

At that time, Wu Tian was still a little confused. Perhaps Lin Fan really did not have much knowledge about glucose.

However, in just a few days, Lin Fan published a complete research paper on islets in Nature.

Looking at it now, Lin Fan did not say anything after he finished watching the experiment because his experiment was full of mistakes. He did not know where to start!

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 347 - 347 I've Already Made It; Choose!

347 I've Already Made It; Choose!

“Yeah, we don’t deserve it.”

Back then, when he encountered many unsolvable problems in the experiment, Professor Wu Tian kept asking Zheng Qian to ask Lin Fan for help.

At that time, Zheng Qian felt that Wu Tian was desperate.

Yes, Lin Fan was indeed an incredible genius.

He solved several math problems and invented the earthquake prediction device and the super battery.

However, nobody was perfect. Lin Fan could not possibly be perfect in every aspect, right?

After all, she had never heard of him doing any research or having any achievements in biomedicine.

However...

Due to Professor Wu Tian's repeated pleas, Zheng Qian had the mentality of fulfilling his wishes. That was why she found Hu Tian and met Lin Fan a few days ago.

Who would have thought that in just a few days, Lin Fan would write the Principles of Human Islet Recovery Medicine and successfully publish it on Nature?!

Lin Fan even wrote her and Professor Wu Tian's names as the second authors.

If the data from the Principles of Human Islet Recovery Medicine were used to develop the hormone recovery medicine, it would be possible for patients to be cured completely.

This was definitely a thesis worthy of winning the Nobel Prize!

Her name had appeared as the second author of the Nobel Prize-level thesis...

When Zheng Qian thought of this, she was so excited that her face turned red.

Lin Fan waved his hand and said, "If you hadn't let me watch that experiment, I wouldn't have been able to write this thesis. So, it's normal for me to write your names."

Lin Fan was definitely not spouting nonsense.

After all, watching the biology experiment was one of the conditions to complete the mission.

“You’re too humble,” Wu Tian said. “Even if you hadn’t watched the experiment, you would’ve still gotten inspiration from somewhere.”

Obviously, he thought that Lin Fan had been inspired by the experiment, which helped him write the thesis.

When solving some difficult problems, some people would suddenly have a flash of inspiration when they were eating, talking, or seeing something. Thus, they could easily solve difficult problems... Such examples were not rare.

It was counselor Sun Yaodong!

“Lin Fan, that’s great. So you’re in school!” Sun Yaodong said happily after seeing Lin Fan.

He walked in front of Lin Fan and patted his shoulder. “Not bad, not bad! You published a paper in Science a while ago, and now you’ve published a paper in Nature too...”

“Back then, I graduated too early. Otherwise, I would have done the same.”

When Sun Yaodong said this, his face faintly revealed a touch of aftertaste and regret.

It was as if he could publish a paper in Nature and Science if he hadn’t graduated so soon.

Professor Wu Tian could not help but cough.

Only then did Sun Yaodong notice that Wu Tian and Zheng Qian were also in the classroom. He could not help but say awkwardly, “Uh... Lin Fan, Chancellor Shen Liang wants to invite you to his office.”

Lin Fan said, “Alright, I’ll go over now.”

As he spoke, he walked out.

After Lin Fan left, Wu Tian, Zheng Qian, and Sun Yaodong did not have any intention of staying in the classroom.

Instantly, the entire classroom was filled with heated discussions.

“F*ck! Brother Lin Fan is too awesome!”

“Brother Lin Fan!!!”

“Excuse me, where can I get a copy of Nature?”

...

Lin Fan was completely unaware of the reactions of the students in the classroom.

At this moment, he had already arrived outside the chancellor’s office.

He raised his hand and gently knocked on the door a few times.

Soon, a deep voice sounded from inside. “Please come in!”

When Lin Fan heard that, he pushed open the door.

At this moment, there were two people sitting in the office. One of them was Chancellor Shen Liang.

The other person was someone whom Lin Fan had interacted with before, the director of the Academy of Sciences, Feng Yuxiang.

“Lin Fan, you’re here. Sit down.” Shen Liang said with a smile. As he spoke, he even personally poured a cup of tea for Lin Fan.

Shen Liang was the chancellor of Jiangbei University. In terms of rank, he was not inferior to the leaders of Jiangbei University.

Now, however, he was personally pouring tea for Lin Fan.

One could imagine how high Lin Fan’s position was in Shen Liang’s heart.

“Hello, Lin Fan. Do you still remember me?” Feng Yuxiang said.

“Hello, Director Feng.” Lin Fan nodded.

“It’s great that you remember me. I don’t like to beat about the bush, so I’ll be straightforward.”

“Actually, I came from Jingbei today to look for you,” Feng Yuxiang said. “I heard that you published a paper in Nature called Principles of Human Islet Recovery Medicine.”

Lin Fan looked at Feng Yuxiang in surprise. This news spread really fast.

Then, he nodded.

“Then are you confident in developing a drug to treat diabetes?” Feng Yuxiang asked directly.

After saying this, he held his breath and pricked up his ears. His eyes stared at Lin Fan without blinking.

It was because this matter... was too important!

“You want to develop a medicine to treat diabetes?” Lin Fan asked.

“Yes!” Feng Yuxiang said.

“I’ve already done it,” Lin Fan said.

Whoosh!

Feng Yuxiang stood up abruptly and said in a trembling voice, “You... You mean... You’ve already invented it?”

“Yes,” Lin Fan said.

Then, he took out the human islet recovery medicine from his pocket.

Feng Yuxiang said, “This... This is...”

“This is the human islet recovery medicine. It can be used to treat diabetic patients,” Lin Fan said.

Although Feng Yuxiang had already guessed it, he was still extremely excited after getting Lin Fan’s confirmation. He said excitedly, “Good, good, good! Haha!”

After a while, Feng Yuxiang suppressed the excitement in his heart and asked, “Can I take this with me?”

“No problem,” Lin Fan said.

Feng Yuxiang held the medicine tightly in his arms as if he were holding a peerless treasure, afraid that it would fall to the ground and shatter.

“There’s one more thing... Lin Fan, can I ask you for a favor? Can you try to let a Hua Nation company be the main sales channel for this human islet recovery medicine?” Feng Yuxiang said. “Of course, you can also register your own company for sales.

“I also know that this may be a little difficult for you, but the country will give you some convenience and compensation.”

The pharmaceutical companies in Hua Nation could only be considered above average internationally.

As a result, many drugs were often snatched by foreign countries.

If Lin Fan was able to let a Hua Nation company be in charge of the human islet recovery medicine, then it was definitely good news for the medical industry in Hua Nation!

However, Lin Fan might lose some benefits.

This was because once this drug appeared, countless foreign pharmaceutical giants would definitely pay a sky-high price to buy the agency rights.

Lin Fan naturally understood what Feng Yuxiang meant.

A sky-high price?

10 billion?

100 billion?

Sorry, he really did not lack it.

Hence, Lin Fan said, "Forget it. If I register my own company, that'll be too troublesome... As for letting a Hua Nation company take charge of the medicine..."

Suddenly, Lin Fan thought of Liu Yuhang, who had called him yesterday.

Did Liu Yuhang and Sun Luguo not own pharmaceutical companies?

Thinking of this, Lin Fan continued, "I've already thought of some Hua Nation companies that I can work with."

Feng Yuxiang stood up, bent over, and said in an extremely solemn tone, "Thank you, Lin Fan!"

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 348 Success; Cooperation Plan! (1)

This 'thank you' was for Lin Fan giving up his interests for the sake of the country.

At the same time, he was also thanking Lin Fan on behalf of the millions of people with diabetes in Hua Nation.

Feng Yuxiang did not stay at Jiangbei University for long. He took the human islet recovery medicine and took the fastest flight to Jingbei.

After arriving in Jingbei, he rushed to the Academy of Sciences.

Along the way, some experts and academicians greeted him.

In the past, Feng Yuxiang would return their greetings one by one.

However, today, it was as if he did not hear them. He simply walked over with large strides.

When he arrived at the Medical Research Institute, Feng Yuxiang called out, "Academician Wang, Academician Li, I just got this from Lin Fan. Quickly test it and see if it has any effect on diabetes."

Academician Wang's expression changed. He said in disbelief, "Director Feng, you mean Lin Fan... has already developed it?"

"Yes!" Feng Yuxiang nodded vigorously.

"Quick, let me see!" Academician Li said.

Then, Academician Wang and Academician Li held the bottle of transparent solution and carefully studied it.

Five hours passed.

"Rat A's blood sugar and hormone levels have stabilized!"

"Rat B's blood sugar and hormone levels have stabilized!"

"Rat C's blood sugar and plasma level are stable!"

"Rat D's blood sugar and plasma level have stabilized!"

...

12 hours passed.

"Rat A's blood sugar and hormone levels are stable!"

"Rat B's blood sugar and hormone levels are stable!"

"Rat C's blood sugar and hormone levels are stable!"

"Rat D's blood sugar and hormone levels are stable!"

...

24 hours passed.

"Rat A's blood sugar and hormone levels are stable!"

"Rat B's blood sugar and hormone levels are stable!"

"Rat C's blood sugar and hormone levels are stable!"

"Rat D's blood sugar and hormone levels are stable!"

...

The white mice were all specially fed and thus suffered from severe diabetes.

Under normal circumstances, not to mention 24 hours, even after five hours, the body's hormones and blood sugar would definitely be abnormal.

Now, after 24 hours, everything was still normal!

This was enough to prove that... the human islet recovery medicine had a healing effect!

Academician Wang and Academician Li were stunned when they heard the results.

They had thought that... the human islet recovery medicine might have a certain effect.

However, they had never thought that the effect would be so obvious!

Seeing that the two of them were silent, Feng Yuxiang could not help but ask, "How is it?"

"It's a success!" Academician Li said.

"Hahaha! Great! That's great!" Feng Yuxiang said excitedly.

...

In Jiangbei City, there were green grass and trees by the lake. There was an open space of nearly 2,000 square meters.

The Liu family's villa was located here.

Liu Sifang, who had a head full of flowery hair, was reading the Nature journal in his hand seriously with his presbyopic glasses.

After a long while, he sighed. "In the past, I always thought that my medical skills were not bad. In the end, let alone curing diabetes, I can't understand even when I'm reading an article on the treatment of diabetes... I really have to admit that I'm old."

Liu Yi, who was wearing gold-rimmed glasses, said, "This article is written using Western medicine terms. It's not your fault."

Liu Sifang shook his head noncommittally.

Liu Chuang, who had a full beard, said, "Old Master, what you meant just now was... The medicine for diabetes has been successfully developed?"

Liu Sifang said, "I consulted some people today. It should be... The name seems to be human islet recovery medicine."

"I'm afraid that all the large pharmaceutical companies in the country and abroad will fight for this medicine," Liu Chuang said.

"Yes, according to the information I received, Gray Rui, Qiang Da, Yunbei Baiyao, Sheng Sheng Tang, and many other top pharmaceutical companies

have already prepared a large number of funds to get the sales rights in one go," Liu Sifang said.

The entire hall fell into a short silence. All of them revealed a look of desire and helplessness.

At this moment, hurried footsteps sounded from outside.

"Dad, Grandpa, Uncle," Liu Yuhang called out. "Do you know about the human islet recovery medicine?"

"Oh?" Liu Sifang could not help but laugh. "Since when did my Yuhang pay so much attention to medical news? Not bad, not bad!"

As he spoke, he picked up the teacup and prepared to take a few sips.

Liu Yuhang said, "This is the medicine that Brother Lin Fan invented. He said that he wants our family and the Sun family to sell it together."

Pfft!

Liu Si spat out the tea in his mouth.

Then, he, Liu Chuang, and Liu Yi stood up from their seats. Their eyes were wide open, and their faces were filled with disbelief.

...

The Imperial Hotel, VIP room.

Liu Sifang, Liu Yi, Liu Chuang, Liu Yuhang, and the other core members of the Liu family, as well as Sun An, Sun Qingquan, Sun Luguo, and the other core members of the Sun family, were all gathered together.

They chatted with each other from time to time, and the atmosphere was extremely harmonious.

If there were other senior executives of pharmaceutical companies in Jiang Province present, they would definitely be so shocked that their jaws would drop to the ground after seeing this scene.

One had to know...

People of the same trade were enemies.

Liu Medical Company and Sun Medical Company were both first-class pharmaceutical companies in Jiang Province.

Due to this, the two families had always been like fire and water, constantly competing for the market.

It was already good enough that the Liu and Sun families did not fight. How could they ever have a meal together?

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 349 - 349 Success; Cooperation Plan! (2)

349 Success; Cooperation Plan! (2)

This was also the reason why Sun Luguo and Liu Yuhang often quarreled.

However, what was the situation now?

Ordinary people naturally did not know that the reason why such a thing happened was because of a young man—Lin Fan!

At this moment, a series of footsteps sounded not far away.

As the door to the private room was pushed open, a tall and handsome young man appeared in everyone's field of vision.

It was Lin Fan!

"Brother Lin Fan!" Liu Yuhang and Sun Luguo shouted at the same time.

At the same time, Liu Sifang, Liu Yi, Sun An, Sun Qing Quan, and the others all stood up.

"Mr. Lin, welcome. Please take a seat."

As for where he sat, Lin Fan did not have many requirements.

After all, no matter where he sat, they were just eating normally.

Therefore, he did not decline too much and directly sat in the main seat.

Liu Sifang said, "Mr. Lin, Yuhang often mentions you in front of us. You have superb driving skills and excellent chess skills. In just three days, you achieved a staggering 400% profit in a god-level operation in the stock market!"

As Liu Sifang said this, his wrinkled old face was filled with admiration.

After a while, he praised, "You're indeed extraordinary after seeing you today!"

He was not exaggerating.

Ever since Lin Fan walked into the room, Liu Sifang had been observing him silently.

Ordinary young people would definitely feel uneasy in front of them.

However, Lin Fan remained calm and collected.

Just this temperament alone was not something ordinary people could compare to.

Sun An said, "I'm not very good at car racing or finance, but I like chess. Mr. Lin, how about we play a few rounds in the future?"

Lin Fan said, "Of course."

"Alright, haha!" Sun An said happily.

Exquisite dishes were served by the waiters.

The general manager of the Imperial Hotel, Wang Fengyi, was holding a bottle of 2003 Lafite. Just as he was about to say something, he suddenly saw Lin Fan, who was sitting in the main seat. He could not help but say in surprise, "Mr. Lin!"

Lin Fan smiled and nodded at him.

For Wang Fengyi to become the general manager of the Imperial Hotel in Jiangbei... In other words, all the big shots and powers in Jiang Province had a certain level of understanding of the situation.

Among them, Sun Medical Company and Liu Medical Company were very important in Jiangbei and even the entire Jiang Province. Wang Fengyi naturally knew about them.

When he found out that Sun Medical Company and Liu Medical Company, which had always been opposing each other, had gathered together to treat someone to a meal, it really surprised Wang Fengyi.

However, after seeing Lin Fan, Wang Fengyi had a look of realization.

To Wang Fengyi, no matter how unbelievable it was, as long as it Lin Fan was involved, it was nothing.

He suddenly understood, but Sun An, Liu Sifang, and the others were somewhat puzzled.

The general manager of the Imperial Hotel seemed to be very familiar with Lin Fan?

“Manager Wang, you also know Mr. Lin?” Liu Sifang could not help but ask.

Wang Fengyi was a little hesitant about whether he should tell the truth.

That was because he did not know if Lin Fan wanted the people in the room to know his identity.

Lin Fan naturally understood Wang Fengyi’s concerns. He could not help but laugh. “I’m the owner of the Imperial Hotel.”

Hiss!

Everyone in the room gasped.

One had to know...

The Imperial Hotel was a landmark building in Jiangbei, and its overall cost was more than ten billion yuan.

He owned a billion-dollar hotel!

Lin Fan was just a young man in his 20s.

This... How incredible was this?

However, how could they have known that the Imperial Hotel was merely one of Lin Fan’s many businesses?

The Sun family and Liu family had only thought of Lin Fan as a genius researcher.

At this moment, they felt that Lin Fan was tall and mysterious.

As the dishes were placed on the table one after another, Liu Sifang raised his wine glass and said, “Today, I’m very happy to be able to invite Mr. Lin for a meal...

“I propose that we all raise our glasses to Mr. Lin.”

“To Mr. Lin!”

Everyone present raised their glasses and drank the wine in their glasses.

As the wine went down their throats, the atmosphere became even more intense.

“During this period of time, Luguo has grown a lot under your influence. Mr. Lin, thank you,” Sun An said.

After saying that, he raised his glass again.

Lin Fan smiled. “How did I affect anything? I’m friends with Sun Luguo and Liu Yuhang. Old Master, you don’t have to be so polite to me. You don’t have to call me Mr. Lin either. Just call me Lin Fan.”

“Alright, haha!” Sun An and Liu Sifang said happily.

...

In this banquet, Lin Fan was undoubtedly the main character. There were countless people toasting and chatting with him.

Finally, Liu Sifang felt that it was about time, so he told him the purpose of the banquet.

“Lin Fan, I heard from Yuhang and Luguo that you’ve developed a human islet recovery medicine and want to hand it over to Liu Medical Group and Sun Medical Group to sell?”

Everyone pricked up their ears when they heard this.

This matter... was of great importance to them.

If they could really become an agent, then Sun Medical Company and Liu Medical Company might become famous pharmaceutical companies in the country or even the world!

This was definitely an opportunity to reach the heavens in a single step!

Lin Fan said casually, "Yes."

Instantly, everyone in the private room began to breathe rapidly.

It was true!

It was true!

"Then..." Sun An asked. "I wonder if you have a plan to act as an agent?"

Lin Fan said, "No... It's too troublesome to prepare for that. Do you have a plan?"

This was the truth.

If he was not afraid of trouble, Lin Fan could have started his own pharmaceutical company to sell the medicine.

Sun An and Liu Sifang looked at each other.

After a while, Sun An said, "In fact, we have a preliminary plan. I'll tell you about it first. If you're not satisfied with anything, you can propose changes."

"Alright," said Lin Fan.

"Sun Medical Company and Liu Medical Company will provide the production plant for the human islet recovery medicine. We'll also be in charge of the advertising, sales, and so on. We'll take a total of 40% of the profits. Lin Fan, you don't have to do anything and you can directly have 60% of the profits of the human islet recovery medicine..."

"We will send you all the sales data regularly. You can check it at any time," Sun An said.

There was no cost and no risk. 60% of the profits would be directly obtained from the technology. Overall, it was a very sincere plan.

Thus, Lin Fan said, "Sure."

Originally, Liu Sifang and Sun An thought that Lin Fan would think for a long time after hearing the proposal.

Perhaps... He would even ask for a few more percentage points.

However, they did not expect Lin Fan to say yes so easily.

He agreed?

This... Did he not even think about it?

Sun An and Liu Sifang had experienced many things.

At this moment, however, they could not help but be stunned.

Sun An swallowed his saliva and said, "Lin... Lin Fan, you mean..."

"What you said just now is fine," Lin Fan said.

In fact, Lin Fan knew that even if he asked for a few more points, it would not be a problem.

However, there was no need.

It was just a few points. Lin Fan did not take it to heart at all.

As long as he did not have to trouble himself, it was fine.

As for the finances, it did not matter even if the Sun and Liu families did not send the data and reports over.

Lin Fan had the super smart watch, Lil White. He could easily find out about the situation.

After getting Lin Fan's confirmation, Sun An and Liu Sifang still felt that it was not real.

The human islet recovery medicine that was enough to make Sun Medical Company and Liu Medical Company soar to the sky was in this man's hands.

Liu Yuhang said, “Brother Lin Fan, please don’t give the Liu and Sun families any benefits just because of me and Sun Luguo.”

“Yeah, Brother Lin Fan. There’s no need,” Sun Luguo followed.

Lin Fan smiled. “Don’t worry, I know what to do.”

“Thank you, Brother Lin Fan!” Sun Luguo and Liu Yuhang said sincerely.

They understood what kind of benefits Lin Fan had brought them.

Lin Fan smiled. “What are you thanking me for? It’s just a small matter!”

Suddenly, a crisp notification rang out in Lin Fan’s mind.

[Ding! You’ve completed the hidden mission—brotherhood. You’ve received two golden packets.]

Lin Fan was stunned.

Brotherhood?

This... It should be Sun Luguo and Liu Yuhang.

In other words, not only could he obtain 60% of the profits of the human islet recovery medicine, but he even got two golden packets?

This banquet was not bad!

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 350 Constitution Enhancement; Let's Go Home!

Now, the cooperation was successful, and he had even received two golden packets.

Everyone from the Sun family and the Liu family, as well as Lin Fan, were in a good mood. The atmosphere of the banquet became even more lively.

When Lin Fan returned to the Coiling Dragon Villa, it was already two hours later.

He sat on the soft sofa and played with his phone for a while.

After a while, he turned his attention to the golden packets.

"Let's see what I can get," Lin Fan muttered.

"Open!"

[Ding! Congratulations, you've received 800,000 yuan.]

[Ding! [Congratulations, you've received a Constitution Enhancement Potion.]

Seeing this, Lin Fan's eyes lit up.

Not long ago, he had obtained a bottle of Constitution Enhancement Potion. After drinking it, his strength, speed, and other aspects had obviously increased greatly.

This was definitely something good.

He did not expect to obtain another bottle so quickly.

When Lin Fan raised his head, he saw a bottle of transparent liquid on the coffee table.

This... It was the Constitution Enhancement Potion that he had just obtained.

Without any hesitation, Lin Fan downed it.

Similar to the last time, it was as if a warm current had flowed through his heart.

At the same time, his entire body was filled with endless power.

Lin Fan jumped up lightly. His entire body seemed to have lost all gravity as he flew toward the ceiling.

Luckily, Lin Fan reacted quickly and blocked it with his hand.

Otherwise, his head would have made contact with the ceiling.

One had to know...

The height of the Coiling Dragon Villa was more than five meters. In other words, Lin Fan easily jumped over five meters!

Then, Lin Fan looked at the dartboard hanging on the wall and took out a dart.

With the 100% Hidden Weapon Skill and his current strength, the dart instantly passed through the bullseye and completely sank into the wall.

Simply... terrifying!

Even Lin Fan was stunned.

'Am I that strong now?'

...

While Lin Fan was in a daze, in the female dormitory of Jiangbei University.

Zhao Ni took a bottle of iced Coke and strode in. She saw Xia Bing and Xia Xue reading on the table.

"Studying again?"

In fact, she was just asking casually.

However, in the next moment, Zhao Ni's tone changed slightly as she said in surprise, "Huh? This is bio... medicine? When did you start researching this?"

One had to know...

During this period of time, Xia Bing and Xia Xue, the two computer geniuses, had been studying chemistry hard every day.

This already made Zhao Ni very puzzled.

It took her a long time to slowly accept this.

Now, they had changed their focus to biomedicine?

Xia Bing and Xia Xue nodded gently and said softly, "Yes... That's right."

Zhao Ni looked at it for a while before rubbing her head. "After learning computer science, you learned chemistry. Now, it's biology... Is this the world of top students?"

She shook her head and walked toward the bathroom.

Xia Bing and Xia Xue slowly turned their attention to the paper in Nature titled Principles of Human Islet Recovery Medicine.

After that, they focused even more on biomedicine.

...

In the blink of an eye, it was the weekend.

Today, the sun was shining brightly, and there was a gentle breeze.

Lin Fan drove the Cullinan toward Qing City.

Back then, when Lin Fan was still at work, no matter how busy he was, he would take the time to visit his parents and sister.

Now that he was just at school, he had to go home more often.

About an hour later, he arrived at the front of Fourth Street.

Lin Fan had just parked his car when he heard Lin Xiaoyao's crisp voice not far away.

"Brother!"

Then, Lin Xiaoyao jogged and pounced on him.

Lin Fan said, "You've gotten lighter again. Your face has become smaller. It's full of bones when I pinch it. Hurry up and eat more!"

"Brother!" Lin Xiaoyao said angrily.

Lin Tao, who was beside them, smiled. "Alright, go in. Your mother should have prepared dinner."

Sure enough, just as he said, the meal was ready.

Shredded pork with green pepper, chicken soup, glutinous rice fish, hot and sour shredded potatoes, sweet and sour pork ribs, cucumber ham, tomato scrambled eggs... Six dishes and a soup filled the table. The appearance, fragrance, and taste were all perfect, making one's appetite rise.

The family sat around the table. The atmosphere was warm and comfortable.

Everyone was very satisfied.

After a full meal, the family sat in front of the television, eating melon seeds and chatting.

"When I went to pick Lil Yao up from school, I saw two kids from her school dating. I was sure to criticize them," Lin Tao said.

"Lil Yao, you can't date in school," Dai Weixue immediately said.

"I won't fall in love. Those little boys in school are too childish," Lin Xiaoyao said.

"Lil Yao can't date, but you can, Lil Fan." Lin Tao nodded.

"That's right! Lil Fan, you should get a girlfriend when you have time. Don't just focus on your studies. There are fewer and fewer women nowadays. If you don't find one now, you might not be able to find one in the future," Dai Weixue followed up with a look of anticipation.

Lin Xiaoyao said, "Dad, Mom, I think... There's no need to worry about Brother dating! He might even have a few girlfriends already."

She knew that Lin Fan owned a lot of villas and sports cars. He had a big house full of Gucci items and was a major shareholder of Cha Yue. In addition, Lin Fan was tall and handsome. How could he not get a girlfriend?

Not to mention other things, her two female classmates were in love with Lin Fan.

"Cough, cough, cough!"

When Lin Fan heard Lin Xiaoyao's words, he almost choked.

Dai Weixue's eyes lit up as she asked, "Really? Lil Fan, when are you going to bring your girlfriend back for us to see?"

Lin Tao, who had been sipping his tea, put down his cup and looked at Lin Fan.

Lin Fan was being stared at by his parents, so he could only bite the bullet and say, "This... I... I'll look for another chance."

What should he do?

Who should he bring back?

Qin Yuxuan?

Qiu Ziqian?

Hu Tian?

...

He could not bring them all back, right?

"Alright, haha!" Lin Tao said happily.

Dai Weixue asked, "Do you have a photo of your girlfriend?"

"I didn't take any photos with my phone," Lin Fan said.

Lin Fan was not lying. He really had not used his phone to take any photos.

Of course, even if he had, Lin Fan would not show them any photos for the time being.

At this moment, Lin Xiaoyao seemed to have thought of something and said in a timid tone, "Brother, if your girlfriend finds out that you just drank the Coke I bought, she won't scold me, right?"

"Your girlfriend won't hit me if she knows that I jumped into your arms, right?"

"Brother, if your girlfriend is so scary... my heart will only ache for you."

After saying that, she even pretended to be trembling.

Dai Weixue said, "You have to be careful in case Lil Fan's girlfriend gets the wrong idea in the future."

"You do have to be careful," Lin Tao added.

Lin Fan smiled. "Dad, Mom, don't listen to Lil Yao's nonsense. She learned this joke from the internet."
