

## Read Married At First Sight Chapter 2444

**Married at First Sight Chapter 2444**-As Kiera said — ‘if you want to cheat, you have to lie for the rest of your life, don’t let the other party know, otherwise you have to be honest early, try to win the other party’s forgiveness, and don’t make the same mistake again and again.’

There was no way Julian could lie to Kiera for the rest of his life.

After all, he still had to take care of the Bucham family’s business. When Kiera married him in the future, he would also get along with his clansmen. How could he keep it a secret for the rest of his life.

Kiera asked gossipingly: “Mr. Bucham, did your friend cheat on the person he likes? Or did he just lie to his brothers and friends?”

Julian: “What should I do? Confid to me, I don’t know what to say, he lies to the other party, as long as he is afraid that the other party will know that he is prone to danger in his life, and scare the woman away.

Emotional matters, it’s better not to deceit. Although his relationship is blank now, but I think, if he cheats on her, she will definitely beat him to pieces, kick him again, and never communicate with each other forever.”

For a moment, Julian was frightened that Kiera was even more cruel than Serenity.

After he swallowed the steamed dumpling in his mouth, he said, “Don’t talk to each other forever?”

So serious?

Kiera said: “He treats her insincerely and deceives her. How can she dare to spend her whole life with this kind of person? Who can guarantee that he will not deceive her in the days to come? Didn’t he say that the relationship must be sincere and the marriage must be sincere? Anyway, I can’t tolerate my boyfriend cheating on me. Looking at character from small things, such a man is not worthy of my entrustment for life.”

After she finished speaking, she laughed at herself and said: “If my mother is here to listen If it comes to me, she will scold me again, blame me for being so serious that I’m only 24 years old, and I don’t even have a boyfriend.

That's my attitude. I'd rather be single for the rest of my life, I don't want to marry a hypocritical person who will lie to me at any time."

Julian's palms broke out in cold sweat.

Fortunately, he asked Kiera now to know her tolerance for deception.

The two of them had not yet become boyfriend and girlfriend, and the issue of emotional deception had not been involved.

Let Kiera know that he was the young master of the Bucham family earlier, and after the two became ordinary friends for a period of time, he would start a formal pursuit of Kiera.

From now on, he would not dare to lie to Kiera.

"Mr. Bucham, is the friend you are talking about Mr. York? Didn't Mr. York deceive the eldest mistress York when he had a flash marriage?" Kiera asked for confirmation.

Julian smiled nonchalantly: "It wasn't him, but he did deceive Serenity back then. Serenity knew that she had been deceived for so long and was so angry that the couple almost couldn't get back together. It's another friend of mine, He is about to follow the old path of Young Master York."

Kiera said: "That friend of yours doesn't know about Young Master York? He has learned from the past, and he is going to follow the same old path of Young Master York?"

Julian: "... .Yes, another day I will properly advise my friend, asking him to treat each other sincerely and stop lying. No matter what the reason is, he can't lie to others, right?"

Reverse roles, let's switch to us. If you are cheated, you will also be very angry. Some people will let go easily and forgive the person who cheated her. Some people cannot tolerate a grain of sand in their eyes. If you are cheated once, not only will you not trust that person in the future, and there is a possibility that we may even cut off contact with each other because of this."

Kiera agreed, "That's the reason. Anyway, I just can't tolerate others lying to me, especially my boyfriend, who is rushing to get married and will become my pillow partner from now on. How can I feel at ease? If the person next to

you lies to you, it can really kill you. If it kills you, you don't even know how you died."
