

I am a quadrillionaire chapter 2678-According to his plan, the strength of both parties must be equally matched, and both parties must have relatively strong personalities for this to be possible.

Once the strength of the two sides was not equal, everything he expected to happen would not happen.

What awaited him next would be the trial of the two Eternals.

'Is this my fate?

'Or is it true that if I do too many bad things, there would be retribution for me?' Spencer thought with great reluctance.

"So this place is the Boundless Galaxy, huh? What level of civilization is it?" David asked casually.

"Level 4!" Reva replied.

'Level 4 civilization?' David thought for a moment.

Level 4, 5, and 6 civilizations all fell within the scope of midlevel civilizations, and the strongest would not exceed partial Saint Realm.

And level 4 civilization was just entering the mid-level civilization stage. So they probably did not even have Eternal Realm Sovereign Rankers. An Immortal Ranker was probably already at the tip of the pyramid.

The woman in front of him had the strength of a middlestage Eternal Realm Beginner Ruler Ranker. So, she should

be among the strongest in this level 4 civilization Boundless Galaxy.

When she saw how David was remaining silent, Reva thought about it and asked, "Are you not from here, kid?"

Judging from her age, it would be fine for her to call David a kid.

"No." David shook his head.

"May I know where you're from then?" Reva continued asking.

"I'm from Star Kingdom."

“Star Kingdom? What level of civilization is that?”

Reva had never heard of Star Kingdom. After all, it was too far away.

With David’s partial Heavenly Overlord strength, he could ignore the laws of space, and it would still take him more than half a year to get there.

If an Eternal were to complete this journey, it would probably not be far from their first Eternal Catastrophe.

“Level 7!”

David’s two simple words made everyone present widen their eyes and feel shocked, including Eternal Reva.

Although everyone did not understand the power of a level 7 civilization, it did not prevent them from knowing the gap between a level 4 and a level 7 civilization.

One was a mid-level civilization and the other had entered the ranks of a high-level civilization.

It could be said that the two were not on the same level at all.

If David said he was from a level 6 civilization, no one would be so surprised, but level 7 was already a height they could look upto.

“K-Kid, you’re from a level 7 civilization?” Reva asked in shock.

“Yes! My name is David Lidell and I come from level 7 civilization Star Kingdom. I passed by the Boundless Galaxy and felt lonely after wandering in the universe for a long time, so I came here to find someone to talk to,” David answered truthfully.

However, he did not say that he was going to level 9 civilization Leila.

These people were so surprised when they heard about level 7 civilization. If they heard level 9 civilization, it would be unknown what their expressions would be like.

Moreover, they might say that he was overestimating his capabilities going from a level 7 civilization to a level 9 civilization.

Some things could not be explained, so it was better not to say them.

Besides, David was not high-profile.
