

Read I am a quadrillionaire chapter 2861

I am a quadrillionaire chapter 2861-A tiny black spot appeared on the edge of the resplendent level 9 civilization Leila in the distant starry sky.

The black spot was tiny at first but rapidly expanded, absorbing vitality from any area it touched.

A living planet would become a dead star in an instant, and all the creatures on it would be reduced to a pile of withered bones.

Such a terrifying scene was horrifying to the people who witnessed it.

Sylvio and Elora knew the seriousness of the matter and wanted to stop Lufian.

However, the difference in strength between them and Lufian was too big, and no matter how hard they tried, they would not pose any threat to him.

At this moment, Lufian was laughing maniacally.

“Hahaha! Sylvio, Elora, did you see that? That’s how strong I am! When I finish devouring all the vitality of Leila, my strength will reach a higher level, and I can directly break through to reach peak Heavenly Overlord Rank. It won’t take long before I become an Almighty in the Origin Realm and become one of the overlords in the universe. On the other hand, David is just a partial Heavenly Overlord, so what can he use to fight me? Even if he has a heaven-defying secret technique, he is still an ant to me. I can decide his life and death with just a snap of my fingers!”

Sylvio wanted to refute when he heard this, but when he opened his mouth, he could not find any reason to refute it.

Lufian was so powerful now that he was frightening.

Even if David was one in a billion, he was too young at the end of the day.

Compared with someone as experienced as Lufian, who had been an Overlord for hundreds of epochs, he was still too young.

Was this the end for Leila?

Sylvio did not want to believe it, but he had to accept this fact.

How big was the universe?

How many civilizations were there?

Every day, countless civilizations were destroyed, and countless civilizations rose.

Life and death was a cycle.

Even if Leila were destroyed, a new civilization would be born here after endless years.

This cycle was called reincarnation.

Leila had already reached this point.

When Elora felt her vitality draining rapidly, she knew Lufian was getting stronger again.

Meanwhile, David had just finished recovering from his injuries, so could he fight Lufian?

Perhaps not.

A few years ago, the war resulted in a loss for both sides.

Yet, Lufian had made great progress, but David had just recovered from his injury.

So, clearly, the gap between both sides had widened.

If David came, he would die.

So what should she do?

Should she tell David not to come?

Elora shook her head.

It was not that she did not want to, but based on her understanding of David, there was no way he would back down.

Suddenly, a figure appeared on the edge of the black spot.

It was David.

He was too far away. He might not have reached one-tenth of the distance if he had not become a partial Almighty.

As he looked at the ripple-like black light spreading in front of him, David frowned slightly but did not move and allowed the black light to envelop him.

A powerful suction tried to suck out David's vitality.

However, no matter how strong the suction was, it could not draw any vitality from the partial Almighty David.

I am a quadrillionaire chapter 2862-Sensing the ominous nature of the black light, David's expression shifted from mild concern to deep unease.

Realizing the potentially catastrophic consequences if these dark energies reached inhabited planets, he swiftly raised his hand in a commanding gesture.

His mind power then formed a transparent barrier to block the spread of the black light.

Although Lufian's Devour was powerful, he was only a mid- Heavenly Overlord.

So, he was much inferior to the Almighty David.

Lufian knew immediately when something blocked Devour.

At the same time, he could also sense David's energy.

He had no idea how David blocked Devour.

His old hatred toward David made him even crazier.

"David! Come and accept your death!" Lufian looked up to the sky and roared angrily.

The strong vibration caused by the sound made Sylvio and Elora dizzy.

Elora vomited out a mouthful of blood as she could not bear it.

Initially, she was trying her best to resist Devour's suction and slow down the loss of her vitality, but Lufian's words broke her defense.

Lufian's roar still echoing in the void when another voice said, "Since you want to die so much, I will fulfill your wish!"

The owner of that voice was naturally David.

At some point, he appeared next to Sylvio and Elora.

At the same time, a force helped the two resist Devour's suction, temporarily relieving them.

"Sylvio, Pebbles, are you okay?" David asked when he saw how poorly the two were.

"We're fine! David, you have to be careful. Lufian has become much stronger. I can't even look into his eyes. If you can't defeat him, just run away! As long as you live, you will surpass Lufian one day. Just come back and avenge us when the time comes," Sylvio said solemnly.

"Sylvio is right. Davey, now is not the time to show off. You must protect yourself. Only if you are alive can you avenge us!" Elora also said.

"Don't worry, I got this."

David replied and locked his gaze on Lufian in the distance.

Since both of them were fine, he felt relieved.

As long as Lufian was not an Almighty, he would definitely die today.

Even if his mind power had to go into hibernation again, David would still kill him no matter what it took.

Lufian's strength has improved too quickly.

If he did not have the system, David would not be comparable to Lufian at all.

Lufian could absorb other people's vitality; he would be a disaster if he were alive.

At this time, Lufian was surrounded by black light. His eyes were dark, and he looked like a terrifying messenger from hell.

Lufian was furious when he heard David and Elora calling each other Pebbles and Davey affectionately.

One must know that for hundreds of epochs and countless days and nights, Elora never cared for him this much.

How long had David been around?

The more he thought about it, the angrier he became.

Boom! Boom! Boom!

After thoroughly going berserk, Lufian's strength went from mid-Heavenly Overlord Rank to peak Heavenly Overlord Rank.

If David were not here, the energy given off by Lufian could seriously injure Sylvio and Elora.

Peak Heavenly Overlord Rank was already the limit an Overlord could reach, and above that would be Origin Realm.

'You shall all perish!' Lufian ground his teeth, uttering each word with seething intensity.

'Really? You might be the one who's going to die.' David smiled scornfully.

He already knew the limits of Lufian's strength.

He was just a peak Heavenly Overlord!
