

Chapter 745 The Mysteries Of Primogem

Bang!

Julie fired a shot near the doctor's feet, her anger palpable. "If it was so risky, why are you only telling me now?"

The doctor looked hurt. "I did tell you. You even agreed!"

Bang!

Another gunshot echoed. Julie's voice hardened. "Regardless, if he dies, I promise you a life of torment." Fear was evident in the doctor's eyes as he anxiously monitored Liam's fluctuating vital signs.

Yet, Liam's vital signs seemed to taunt him. Each time they dipped to dangerous lows, they improved slightly, indicating he could perish at any moment.

The doctor shot up, staring at Liam in sheer disbelief. After years of human experimentation, this was entirely new territory for him!

He quickly used the endoscope to inspect Liam's heart and noticed a white misty substance emanating

energy near the heart area.

This energy, combined with the potent drug, was slowly being assimilated by Liam.

The doctor's body shuddered, as if hit by a surge of electricity. He whispered in astonishment, "No way... it's the power of the primogem!"

The realization hit him hard.

Liam possessed the energy of the primogem!

This explained his exceptional physical and combative prowess!

The revelation was so astounding that it challenged everything the doctor thought he knew. He was confident now that not only would Liam pull through, but he'd come out stronger.

Seeing the doctor's bewildering reaction and not grasping his words, Julie demanded, "What's happening? Don't talk nonsense!"

Exhausted, the doctor sank into a chair, murmuring, "He's one lucky man. You have nothing to fear."

With that, he distanced himself from the instruments, letting Liam's body find its balance without any further interference.

Thirty minutes passed and, just as the doctor had predicted, Liam's condition began to improve. The

luminous green glow within him slowly faded. Things were looking up.

The doctor commented in a measured tone, "He's now out of danger."

Suddenly, Liam's eyes fluttered open, signaling his return to consciousness.

A wave of relief washed over Julie. She approached, holding back her tears, and clasped Liam's hand.

Despite regaining consciousness, Liam was still drained and needed some peaceful rest.

Liam's gaze settled on the doctor seated beside him, suspicion evident in his eyes. Instinctively, he wanted to summon someone to remove the doctor.

Julie intervened. "It's alright, Liam. He's the reason you're still here."

Liam's surprise was palpable. Julie filled him in on the recent events, and he grew calmer.

"You may have saved me, but that doesn't buy my trust. Leave Invone and never cross my path again," Liam instructed the doctor, his voice icy.

Yet, the doctor seemed in no rush to depart. He leaned in, whispering, "May I have a moment with you in private?"

Liam's brow furrowed. He instructed those around him,

"Could everyone step out for a moment?"

Once the room was emptied of everyone but Liam and the doctor, Liam's voice took on an even colder tone. "If you've got something to say, don't hesitate to speak up. But let me be clear, saving me doesn't mean you can act without conscience. If you make another mistake, I won't hesitate to end you!"

Taking a moment, the doctor began, "I'll be direct. Why do you have primogem inside you?"

Liam, genuinely puzzled, responded, "Primogem? What are you talking about? I've never encountered such a thing."

The doctor's expression was grave. "In essence, primogem is pure energy. It enhances a person's physical abilities. It played a role in your recovery."

Liam shook his head. "This is news to me. But if you say it's there, I'll take your word for it."

Deepening his tone, the doctor added, "I came across this phenomenon two decades ago. What you need to know is that the vanishing of your parents was tied to the primogem."

Liam became visibly agitated. "Make it clear!"

The doctor remained cryptic, merely shaking his head.

"That's the extent of my knowledge. If you wish to
